RE: Exams – Advanced Information, Summer 2022

Dear «Parental_Salutation»

You may be aware that the exam boards have recently published advance information regarding the content of this Summer's examinations for the majority of GCSE, AS and A-Level subjects in order to support students' revision and to enable teachers to adapt their teaching in the run up to the exams.

Along with a choice of topics in GCSE English Literature, GCSE History, and GCSE Geography, there will be advance information given to students on the content of all other exams at both GCSE and A-level which can be used as revision guidance. There will be support materials given in GCSE Mathematics (formula sheets), and GCSE Physics and Combined Science (equation sheets).

In order to help you to access this information, I have provided links to the advance information for each subject below, along with the JCQ guidance, a frequently asked questions document produced by the JCQ, and the information postcard produced by Ofqual.

Each department will communicate directly with the students regarding the specific implication of the advanced information for their subject.

Whilst examinations are still very much planned to go ahead, I would like to remind students that the contingency plan of Teacher Assessed Grades is still in place for this summer.

I hope that you find this information useful, but if you do have any questions in the meantime, please do not hesitate to contact the relevant Head of Department for subject specific queries, or myself for any other queries.
